

Indiana's don't call list has been very helpful to us in eliminating unwanted phone interruptions. If I want any of the businesses that I do business with to call me, I should have to individually authorize them to do so. I hope you will continue to restrict their access to me without my written approval. There is no business relationship implied by having to do business with them and thus authorizing them to call me. Do not authorize them calling me just because I use their services.
